Ensure An Absolute Vacuum Seal

1-866-476-0367

The Elbow Saver™ Provides Benefits For Both Old And New Elbows

Eliminate the potential for costly and wasteful leaks resulting from the metal-to-metal discharge connections or from lost or damaged sealing rubbers between pump and elbow.

Plus, Elbow Saver repairs worn and corroded base elbows instantly and does so for a fraction of the cost to replace an elbow.

Now, you can benefit from increased pumping efficiency and, at the same time, minimize the maintenance costs of your submersible pump installation when you employ the highly-effective Elbow Saver.

The Elbow Saver is easy to install because the unique POWER THREAD™ design allows you to just press it into place. The POWER THREAD design holds the Elbow Saver in place without the need for gluing or wasteful glue-related set-up time. Its fast, easy, and absolutely

Unique POWER-THREAD™ design simply pushes into place. No glue required and no set-up time.

effective. Shouldn't your pump stations be benefiting from the absolute seal provided by the Elbow Saver?

If you are looking for a way to save on energy and reduce maintenance on your submersible pump stations—look to the Elbow Saver. It's an inexpensive but valuable upgrade.

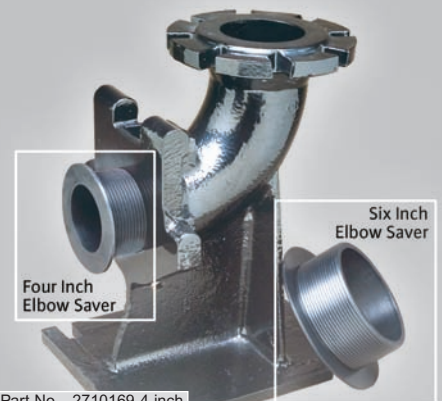

The Elbow Saver™ Fits All Makes and Models of Elbows.

Presses Into Place
