

# It's The Made In The USA Label

Now, you can put EMU Technology to work for your city or facility knowing that we are taking specific steps to reduce cycle time and provide you with reliable lead times.

Now, pumps up to 12 inch discharge are being cast, machined, tested and assembled in the USA. This means that the specific pump you need for your application can be delivered in less time so you can start enjoying the benefits of EMU Technology sooner.

Why have we added casting and machining capabilities in the USA? It's really quite simple; at WILLO, we want to be your pumping and mixing solution for life. That's why we're bringing our manufacturing closer to you.

***Casting, Machining, Assembly, Final Testing—Brought To You From Thomasville, GA USA***
